Job Title: Full-Stack Web Developer

Company: Goloka IT

Location: Mumbai

About the Company:

Goloka IT is a fast-paced, innovative startup that is revolutionizing the IT & Marketing industry. We are passionate about building products that make a real difference in people's lives. We are looking for a talented Full-Stack Web Developer to join our team and help us build the next generation of web applications.

About the Role:

As a Full-Stack Web Developer, you will be responsible for the entire web development process, from designing and developing user interfaces to building and maintaining backend systems. You will work closely with our team of designers, product managers, and other developers to create high-quality, scalable, and user-friendly web applications.

Responsibilities

- Design and develop complete solutions within specified schedule requirements.

- Design, develop, conduct unit testing, and release functionality to enhance the user experience.

- Troubleshoot development and production issues across multiple environments and operating platforms.

- Ensure the technical feasibility of UI/UX designs and optimize applications for maximum speed and scalability.

- Collaborate with a team of designers, product managers, and other developers to create a user-friendly and engaging online experience for customers.

- Stay updated on the latest web development trends and technologies.

Qualifications:

- Experience: Open to candidates with 0-3+ years of experience as a Full-Stack Web Developer, and freshers are encouraged to apply.
- Content Management Systems (CMS): Knowledge of CMS systems such as WordPress or WIX, including the ability to modify themes.
- Front-End Technologies: Proficiency in front-end technologies, including JavaScript, jQuery, AJAX, and experience with one of the following frameworks/libraries: React, Redux, Next.js, and Flutter (for hybrid mobile application development). Also, experience in one of the UI frameworks like Tailwind CSS, Bootstrap, or Material UI.
- Server-Side Languages: Familiarity with one of the server-side languages, including PHP, Node.js, Java, Python, or Ruby.
- Databases: A solid understanding of structured databases, including MySQL, PostgreSQL, SQL Server, as well as NoSQL databases like MongoDB, Firebase, and Oracle DB.
- APIs: Experience working with JSON and XML for implementing Rest and SOAP-based APIs.
- Version Control and Tools: Proficiency with version control tools like Bit bucket and Git, project management tools such as Jira, and API testing tools like Postman.
- Cloud Services: Knowledge of one of the cloud services, such as AWS, OCI (Oracle Cloud Infrastructure), Azure, GCP (Google Cloud Platform), and an understanding of their usage
